

Remark Office OMR Support in Windows 10

Article Number: 202 | Rating: Unrated | Last Updated: Fri, Dec 18, 2015 at 1:58 PM

Remark Office OMR 2014 is supported under Windows 10. Please note that the .NET 3.5 framework is needed and if it is not found, you may receive a message explaining that you need to enable the .NET 3.5 framework. Windows may try to enable it for you during the installation, or you can click [here](#) to see how to do it yourself. This problem is not common. It is also recommended that when starting the application, you right click the Remark Office OMR icon and choose Run as Administrator. Permissions can be a little tricky with Windows 10, and even if you are an administrator on your computer, this step will ensure that you and the application have proper permissions while running the application.
