

Printing Grades and Other Information on Forms During Scanning

Article Number: 22 | Rating: Unrated | Last Updated: Thu, Aug 28, 2014 at 4:38 PM

In Remark Classic OMR, you can use the **Grade and Print** feature if your OMR scanner has a transport printer. First, make sure you have marked the option for a printer in the software's preferences under **Tools|OMR Scanner** (Transport printer installed). When you launch the Read Wizard to scan forms, you will see the option to **Activate Printing**. Under **Print Items**, select **Grade**, **Total Score** or **Percent Score**. Click **OK** to begin scanning forms.

As each form is scanned, the data is graded based on the first form that was scanned (the answer key), and then the item you chose to print is printed on the forms. **Note:** The answer key must be the first form scanned in order to use this feature. You can also use the other options available in the Print Items list to print non-grade information, such as date, record number, etc.
