You may delete a test at any time, but note that this action is permanent and all of the data is lost. Start out on the page of the class that has the test you would like to delete. If you are in "Cards" view, simply press "Delete" and type in your password when prompted.

If you are in "Table" view, click the trashcan icon to the right of the screen to delete your specified test.

When prompted, type in your password to permanently delete your test.
