

## All BLANKS Scanning with Scantron OpScan OMR scanner

Article Number: 32 | Rating: 5/5 from 2 votes | Last Updated: Thu, Aug 28, 2014 at 4:20 PM

If all responses are showing up as BLANK in your scanned data, you may be scanning in the incorrect mode on your OpScan scanner. In the scanner's configuration, on the **Control Panel**, make sure the scanner is set to **Image Scan** as opposed to **3000 Emulation Mode**. Then try scanning again.
