

Image Appears as Broken Link in Remark Web Survey

Article Number: 70 | Rating: Unrated | Last Updated: Tue, Aug 26, 2014 at 4:29 PM

Check the color format of your image. If the image is in **CMYK** format, it often cannot be displayed on an HTML (web) form.

This is because **RGB** (**R**ed, **G**reen, **B**lue) is colored light. **CMYK** are pigments (**C**yan, **M**agenta, **Y**ellow, **blacK**) intended for print, where color is perceived via reflected light. Since browsers are designed to work with monitors and colored light, there is no implementation to manage the "fourth channel." As a workaround for this problem, try saving the file using the **RGB** (**R**ed **G**reen **B**lue) color format instead.
